COMPANY INTRODUCTION

Established in 2019, Nam Viet Energy Technology Company Limited (NVETC) is one of the companies providing comprehensive solutions and services in the design, supply, installation, testing, calibration, acceptance, renovation and maintenance of energy projects such as power plants, substations, etc.

COMPANY STRUCTURE

BUSINESS FIELDS

- **Design, supply and installation servives** (EPC, EC, PC, Lump Sum Turnkey), partial or full renovation of systems (mechanical, electrical, protection, automation, etc.) for power plants, substations.
- **Supply of goods, materials, components and software** domestically and internationally.
- **Providing optimal solutions** (including software, equipment, etc.) in the fields of industrial automations and digital transformation.
- **Electrical testing and calibration services** for power plants and substations.
- **Inspection** of electrical equipment.
- **Repair, maintenance, and troubleshooting services** for power plants, substations, and industrial plants.
- **Technical and legal consultancy services** related to grid connection agreements with the Vietnam power grid (domestic and international), SCADA and telecommunication system design approvals, protection relay system design approvals (for power plants and substations), metering agreements, and remote control center establishment projects.
- **Training, energizing, commissioning, and commercial operation** of electrical systems and projects.
- **Research and development of products** in the fields of digital transformation.
- **Investment** in energy projects and infrastructure.

TYPICAL CONTRACTS PORTFOLIO

CONTRACTS

- Providing services for the implementation of special agreements and COD consulting services for hydropower plants in Nam Mo cluster, Laos according to agreements with EVN and EVN's member units.
- Consulting on making dossiers and approving the plan to energize the connection point of Song Giang 1 hydropower plant to the national power system for test taking.
- Installation & Legal services for the establishment of Duyen Hai 2 remote control center.
- Installation of electrical equipment - A Vuong Hydropower 5.

- Supply & Installation – DCS, AGC System – Sao Va Hydropower.
- Installation & Legal services for the establishment of the remote control center of Nam Vao Hydropower Cluster.
- Supply & Installation – DCS, AGC, and Protection Relay System – Bac Binh Hydropower.
- Supply & Technical Services for energy metering system – Dak Mi Hydropower 4A, 4B.
- Scada system configuration services - Chinh Thang Wind Power Plant.
- Periodic electrical system testing - Nam Si Luong 3,4 Hydropower Plant.

- Technical Services & Commercial Operation (COD) - Nam Sam Substation and Nam Sam 3 Hydropower Plant, Laos.
- Technical Services for Project Nam Sum 1A Hydropower, Laos.
- Measurement and testing services for electrical equipment - 500kV booster substation project of the Monsoon Wind Power Project, Laos.
- Supply and Installation of Hydro-mechanical and Electrical Equipment, 22kV Step-up Substation – Reservoir A Dam Raising and Construction of Cluster B Power Plant – Dak Pone Hydropower Project.
- installation & Configuration of electrical and control systems for D08 area – Lam Dong Aluminum Plant Project (TKV).
- Inspection, maintenance, testing, and periodic technical safety certification of electrical equipment and systems – Tan My 2 Hydropower Plant.

- Installation, Configuration & Testing – Nam Sum Substation, Laos
- Installation of Hydro-mechanical Equipment – Nam Sum 1A Hydropower Project, Laos.
- Supply, Transport & Installation – Telecommunication and Database Systems – HPP & National Load Dispatch Center (A0) – Nam Tai Hydropower Project, Laos.
- Detailed Electrical Design, Programming, and Installation of Control Panels for Bagging Machines – Dak Nong Aluminum Plant.

(Updated May 2026)

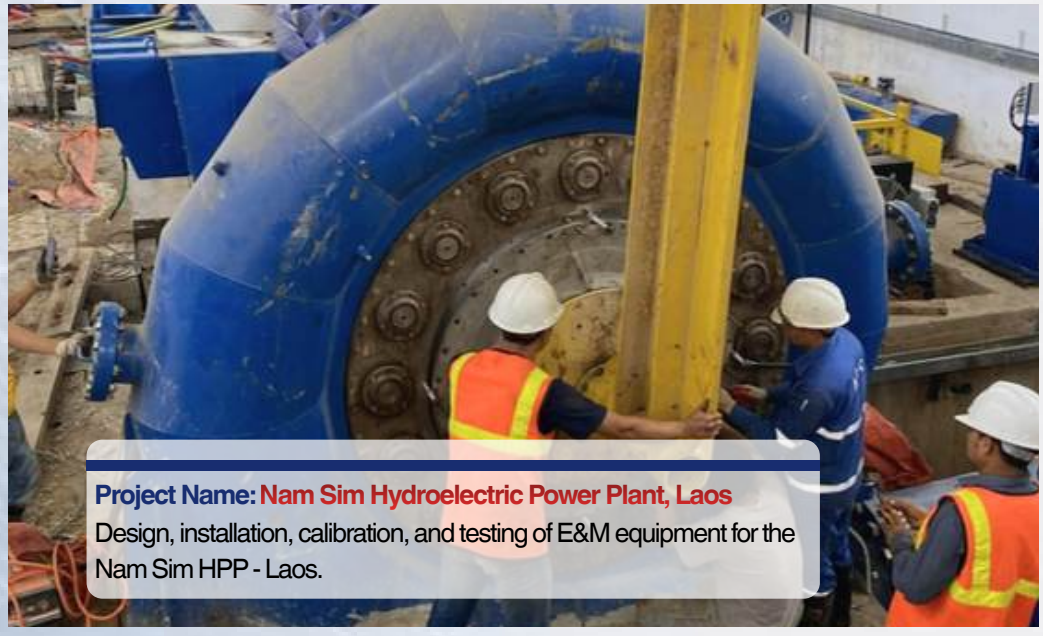

FEATURED PROJECTS

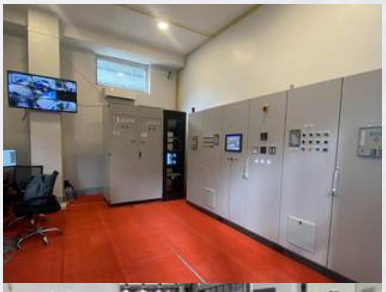

Project name: Nam Sum 1A Hydroelectric Power Plant, Laos
Installation, testing, calibration, energization, and handover of the COD for the 220kV Nam Sum 1A substation - Laos.

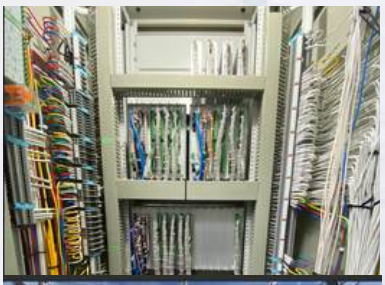

Project Name: Nam Sim Hydroelectric Power Plant, Laos
Design, installation, calibration, and testing of E&M equipment for the Nam Sim HPP - Laos.

Project Name: Nam Sum Switching Substation, Laos
Installation and testing of Nam Sum SS – Laos.

FEATURED PROJECTS

Project Name: Dak Mi 4 Hydroelectric Power Plant
Replacement, testing, consulting, design, and energization at Dak Mi 4 HPP.

Project Name: Nam Si Luong 3 & 4 Hydroelectric Power Plant
Periodic testing of electrical equipment in 2025 at Nam Si Luong 3 & 4 HPP.

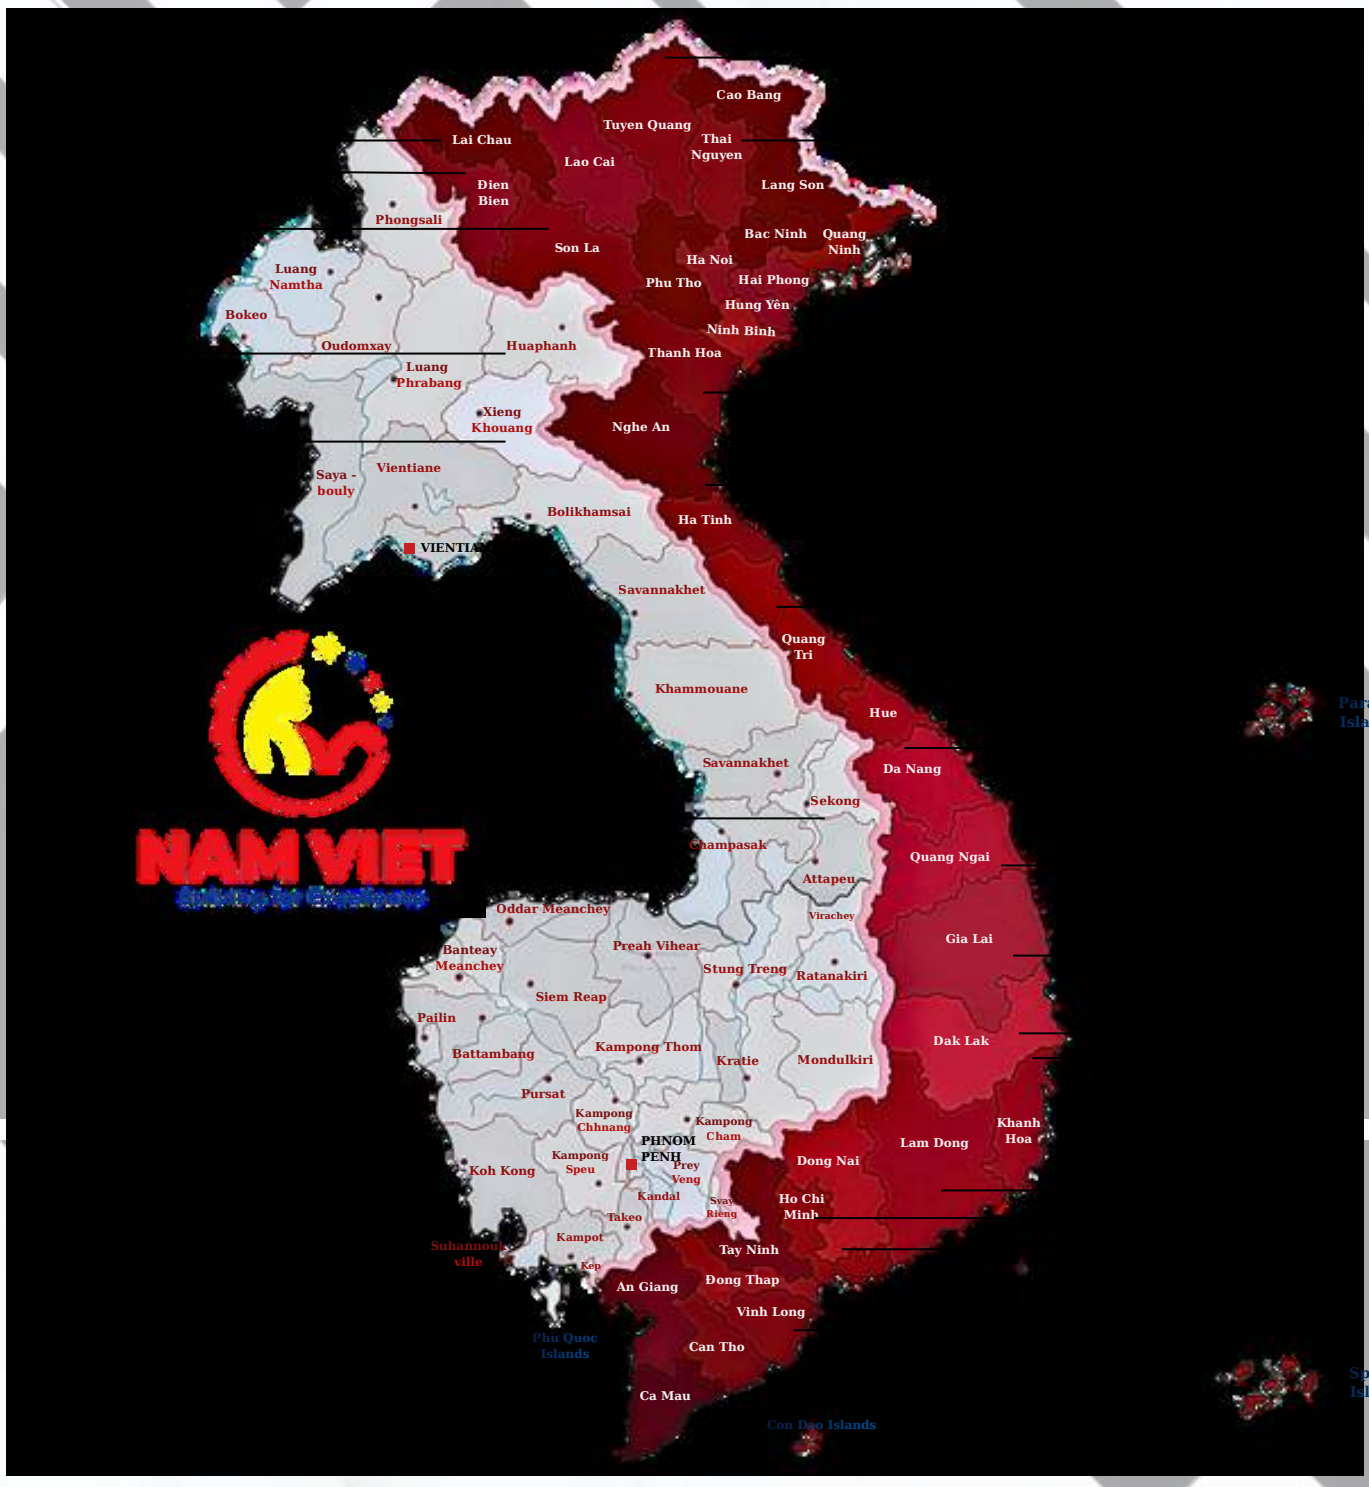

Project Name: Dong Nai 1 Hydroelectric Power Plant
Installation and testing of electrical equipment at the 110kV substation of Dong Nai 1 HPP.
